Media Sources — NeighborhoodTools

Project: NeighborhoodTools (WEB-289, Spring 2026) **Author:** Jeremy Warren **Document version:** 2026-04-28 **Live site:** https://neighborhoodtools.org **Repository:** https://github.com/jeremyw0886/neighborhood-tools-capstone

This document inventories every media asset shipped with the NeighborhoodTools codebase, with a thumbnail, the page where the asset can be obtained, and its license. Authoritative attribution is consolidated in public/assets/README.md; this document mirrors that README and adds per-file thumbnails and DB context.

Generated derivatives (`-400w.webp`, `-900w.avif`, `-80w.jpg`, etc.) are produced at runtime by the project's own image pipeline (src/Core/image_processor.php). They inherit the source attribution of their original and are not separately listed; see §8.

---

1. Brand and UI Assets

1.1 Logo family — Alyssa Companioni (original) + Jeremy Warren (mark variant)

The original logo (`logo.svg`) was designed by **Alyssa Companioni**. The compact mark is a layout variant Jeremy Warren produced from Alyssa's original.

- **Designer portfolio:** https://alyssacodes.dev

Thumbnail	File	Used as	Source / hosting page	License
	`public/assets/images/logo.svg`	Primary site logo	Designed for this project by Alyssa Companioni	Project-internal — used with permission
	`public/assets/images/logo-mark.svg`	Compact icon mark (header preload, footer, hero background)	Variant by Jeremy Warren, derived from Companioni's logo	Project-internal

1.2 UI placeholder & empty-state SVGs — SVG AI (paid plan)

Generated with **SVG AI** under a paid plan. All generated SVGs are royalty-free and cleared for personal and commercial use; the subscriber owns the rights to graphics they create.

- **Source / hosting page:** https://www.svgai.org/ai-icon-generator
- **Full terms:** https://www.svgai.org/terms

Thumbnail	File	Used as
	`public/assets/images/tool-placeholder.svg`	Fallback when a tool listing has no photo
	`public/assets/images/avatar-placeholder.svg`	Fallback when an account has no avatar
	`public/assets/images/empty-search.svg`	Empty-state graphic on `/available` and `/tools`

1.3 Favicon — OpenAI Codex (AI-assisted) + Jeremy Warren (cleanup) + favicon.io (raster set)

The favicon is a standalone toolbox icon — gold toolbox shape on a dark green rounded background, using the project's pine/gold palette. It is **not** a derivative of the Companioni logo. The source SVG (`public/assets/images/favicon.svg`) was initially scaffolded with **OpenAI Codex** AI assistance, then cleaned up and finalized by Jeremy Warren. The SVG uses `viewBox`-only sizing (no `width` / `height` attributes) so the same file scales crisply at every favicon target — 16×16 tab icons, high-DPI bookmark bars, and 144×144 pinned-tab previews alike. The raster set in `/public/` was generated from that SVG via favicon.io, so the rasterized artwork matches the source byte-for-byte at the canonical sizes.

- **Source SVG hosting page:** https://openai.com/codex/ (AI assistant; output ownership assigned to user per OpenAI Terms of Use)
- **Raster generator hosting page:** https://favicon.io/
- **License:** Project-internal — OpenAI assigns generated-output ownership to the user; favicon.io output is free for personal and commercial use.

Thumbnail	File	Purpose	Wired via
	`public/assets/images/favicon.svg`	Modern-browser favicon (source SVG)	`<link rel="icon" type="image/svg+xml">`
(multi-size)	`public/favicon.ico`	Legacy-browser fallback (contains 16×16 + 32×32 layers)	`<link rel="icon">`
	`public/apple-touch-icon.png`	iOS home-screen icon	`<link rel="apple-touch-icon">`

Thumbnail	File	Purpose	Wired via
	`public/android-chrome-192x192.png`	Android Chrome PWA icon	`public/site.webmanifest`
	`public/android-chrome-512x512.png`	Android Chrome splash icon	`public/site.webmanifest`

---

2. Tool Catalog Photographs — Artlist AI

AI-generated product photographs shown in the public catalog at `/available` and on individual tool pages. Generated with **Artlist AI Image Generator** under a paid subscription. Artlist assigns all right, title, and interest in the AI output to the subscriber; images are cleared for commercial use without restriction, subject to Artlist's Terms of Use.

- **Source / hosting page:** https://artlist.io/ai/image-generator
- **License details:** https://artlist.io/help-center/privacy-terms/artlist-license/

Thumbnail	Tool name	Filename (base)
	DeWalt 20V Cordless Drill	`tool_69ae1c80cd1bc2.67867757.jpg`
	Craftsman 16oz Claw Hammer	`tool_69ae1ca0c4c152.21848106.jpg`
	Stihl MS 170 Chainsaw	`tool_69ae1cbf539b12.86789512.jpg`
	Makita Circular Saw	`tool_69ae1cf1bb8152.75002348.jpg`
	Milwaukee Reciprocating Saw	`tool_69ae1d0a98da25.72564674.jpg`
	Werner 24ft Extension Ladder	`tool_69ae1d242c92c1.94779517.jpg`

	avatar-16	`avt_69a5ab0b3867b2.21771731.svg`

---

4. Category Icon SVGs — SVG AI (paid plan)

Vector icons displayed beside each tool category in the catalog filter UI. Generated with **SVG AI Icon Generator** under a paid plan. Royalty-free, cleared for personal and commercial use; the subscriber owns the rights to the generated graphics.

- **Source / hosting page:** https://www.svgai.org/ai-icon-generator
- **Full terms:** https://www.svgai.org/terms

Thumbnail	Category	Filename
	Woodworking	`vec_69a5a8e9b983b5.40099131.svg`
	Power tools	`vec_69a5a8f222cd44.04412313.svg`
	Plumbing	`vec_69a5a8fd942530.77798160.svg`
	Outdoor/Landscaping	`vec_69a5a9129dda31.67768932.svg`
	Hand tools	`vec_69a5a91a4bdec2.76135786.svg`
	Gardening	`vec_69a5a921b296e2.24521923.svg`

Thumbnail	Category	Filename
	Electrical	`vec_69a5a92b9a77b9.09013646.svg`
	Automotive	`vec_69a5a93d7dcce7.58612372.svg`

---

5. Incident Report Attachments — Artlist AI

Photographs attached to seeded incident reports demonstrating the dispute/incident reporting flow. These are staged scenarios — no real persons or locations. Generated with the same **Artlist AI Image Generator** subscription used for the tool catalog.

- **Source / hosting page:** https://artlist.io/ai/image-generator
- **License details:** https://artlist.io/help-center/privacy-terms/artlist-license/

Thumbnail	Filename	Used for incident
	`porch-empty-01.jpg`	Theft — empty back porch
	`porch-security-cam-02.jpg`	Theft — security camera still
	`police-report-03.jpg`	Theft — Asheville PD report
	`overdue-screenshot-01.jpg`	Late return — dashboard screenshot
	`ladder-leveler-pickup-01.jpg`	Loss — leveler attached at pickup
	`ladder-base-return-02.jpg`	Loss — leveler missing at return
	`chainsaw-cord-frayed-01.jpg`	Condition dispute — frayed pull cord
	`finger-cut-bandaged-01.jpg`	Injury — bandaged finger after circular-saw kickback

Thumbnail	Filename	Used for incident
	`wrong-charger-01.jpg`	Other — Black & Decker charger in DeWalt case
	`drill-scratch-closeup-01.jpg`	Damage — close-up of scratches on drill chuck
	`drill-overview-02.jpg`	Damage — wider view showing affected area

All 11 filenames referenced by `incident_photo_iph` seed inserts are present on disk and have the full `-400w` / `-640w` variant set in jpg/webp/avif (regenerated via `local_testing/images-fix/regen-incident-variants.php`).

---

6. Self-hosted Vendor Assets

6.1 Font Awesome Free 6.5.0 (subset)

Item	Value
Type	Icon font + CSS
Source / hosting page	https://fontawesome.com/
Version	6.5.0 (Free, project-specific subset)

Files	`public/assets/vendor/fontawesome/css/fontawesome-custom.min.css`
	`public/assets/vendor/fontawesome/webfonts/fa-regular-400.woff2`
	`public/assets/vendor/fontawesome/webfonts/fa-solid-900.woff2`

Icon license	CC BY 4.0 — https://creativecommons.org/licenses/by/4.0/
Font license	SIL OFL 1.1 — https://scripts.sil.org/OFL
CSS code license	MIT — https://opensource.org/licenses/MIT
License page	https://fontawesome.com/license/free
Attribution	Original copyright and license header preserved at the top of `fontawesome-custom.min.css` (verified).

6.2 DOMPurify

Item	Value
Type	Client-side HTML sanitizer (JavaScript)
Source / hosting page	https://github.com/cure53/DOMPurify
Files	`public/assets/vendor/dompurify/purify.min.js` `public/assets/vendor/dompurify/purify.js`
License	Apache 2.0 OR MPL 2.0 (dual-licensed) — https://github.com/cure53/DOMPurify/blob/main/LICENSE
Attribution	License header preserved at the top of `purify.js` (verified).

6.3 enshrined/svg-sanitize (server-side, Composer)

Not strictly a media asset, but bundled via `composer.json` to sanitize user-submitted SVGs before storage. Listed for completeness because it processes user media.

Item	Value
Source	https://github.com/darylldoyle/svg-sanitizer
License	MIT — https://github.com/darylldoyle/svg-sanitizer/blob/master/LICENSE
Bundled via	`composer.lock` (production deploys regenerate `vendor/` from lockfile)

---

7. Generated Derivatives (Not Separately Attributed)

The following file patterns are auto-generated at upload time by src/Core/image_processor.php and inherit the source attribution of the original they were derived from. They are intentionally **not** listed individually above.

Pattern	Description
`*-400w.{jpg,webp,avif}`	400 px responsive variant (catalog cards)
`*-600w.{jpg,webp,avif}`	600 px responsive variant
`*-900w.{jpg,webp,avif}`	900 px responsive variant
`*-1200w.{jpg,webp,avif}`	1200 px responsive variant (tool detail hero)
`*-80w.{jpg,webp,avif}`	80 px avatar thumbnail
`*-150w.{jpg,webp,avif}`	150 px avatar variant
`*-240w.{jpg,webp,avif}`	240 px avatar variant

Pattern	Description
`*-640w.{jpg,webp,avif}`	640 px incident-attachment variant
